

To the FCC

I respectfully urge the FCC to reject NAB's petition 04-160. I have been a listener to XM Radio for the past two years and am convinced it serves a very useful place in our communications with one another. I particularly, appreciate being able to get weather and travel information, as I do a lot of vehicular travel. Local radio stations all have different call numbers and positions on the dial. Once I learned XM, they are consistent and available when I need them. They provide programing not available anywhere else to my knowledge.

Thank you for considering my request,
Geraldine Stites
